1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 5-15, 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kollmorgan Corp (as cited by applicant) in view of Barrett, Mitchell et al and Kirita (as cited by applicant).

3. Kollmorgan Corp discloses motion control comprising stepper motor, dc motor mechanically coupled to stepper motor and control module connected to both motors for controlling both motors, see pg 1 lines 55-60, pg 2 lines 40-55, and figs 1 & 2.

Kollmorgan Corp lacks disclosing motion control system is operated with only one of the motors providing power and the other motor de energized, bemb for position of motor, and scanner. Barrett discloses motors being used one at a time or together, see col 11 lines 65-col 12 lines 10 and col 13 lines 1-3. Mitchell et al discloses bemb for stepper motor for position of motor, see fig 1, 24 & 28 and col 3 lines 35-50. Kirita discloses scanner see abstract. It would have been obvious to one of ordinary skill in the art to combine the motion control of Kollmorgan Corp with control of Barrett and bemb of Mitchell with the Scanner of Kirita for efficient control, space control and position information for accurate timing of commutation.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Barrus et al discloses bemb for position control.
